Redesigns of characters from My Little Pony: Friendship Is Magic. Including appearance, backstory, and post-canon.

Characters redesigned so far: Fluttershy

Tell me what you think!

Everfree Guardian

Fluttershy redesign!

Changes applying to all ponies:

- 1) Visible hooves, darker shade of coat color.
- 2) Ear redesign, with inner ears a darker shade of coat color.
- 3) Mouth and nose change.

Changes applying to Pegasi:

- 1) Wingtips are the same as the eye color.
- 2) Relatively small body shape, for aerodynamics. (Though Fluttershy is unusually tall and was lanky as a teen).

Changes specifically to Fluttershy:

- 1) Green turtleneck, for her to hide in.
- 2) After Flutterbat, she develops a fang, bat-bird hybrid wings, and more bat-like ears. Her Cutie Mark as well begins changing.
- 3) For three nights every month (the full moon), she retakes the form of Flutterbat. Over time, she gains more control of herself in this form, but is still impulsive/easily distracted/animalistic.
- 4) A while after she meets, she starts wearing a tornado necklace without explanation.
- 5) Each of the Mane Six become guardians over a place and/or concept, so long as it exists so will they. She gets the Everfree Forest. Over years, she slowly changes into a

weird hybrid queen of the forest. Angel Bunny changed with her, due to representinh her connection to animals.

6) The Element Of Kindness changes with her (it was never destroyed), eventually developing a consciousness of its own.

7) Discord is balanced out a bit to be a little less evil, but his reformation arc takes much longer. They eventually start dating, getting married towards the end of/after the show. They have at least three kids, maybe more.

8) She slowly gets more confident/sassy as the series goes on, eventually becoming a pony that -- while kind -- will not take anycreature's shit. Her friends were a big influence on this, but Discord helped her make the most progress.

9) She is 19 at the beginning of the series, and is Rainbow Dash's cousin.

10) Due to her Element's influence and her own mild hypnotic abilities, she develops the ability to read emotions. Much, much later, she is able to influence emotions.

11) If she was human, she'd be a Latina/Canadian mix.

12) She is the only one Discord trusts enough to reveal he has panic attacks and trauma from various things throughout his long life (most of which from the show's run). She knows how to help him due to her own issues.
